About Me

BCA student (MAKAUT, graduating June 2027) with strong expertise in Node.js, Express.js, and MongoDB for backend development.
Experienced in building RESTful APIs, authentication systems, and full-stack applications using React, with a focus on scalable and efficient solutions.

PROJECTS

Bullshift :-

Developed a responsive web application using HTML, CSS, JavaScript, Bootstrap, Slick, and Fancybox during 3rd year of BCA.
Implemented interactive UI components and optimized user experience with modern frontend techniques.

KIKSTART (Ongoing) :-

Developing a full-stack web application using Node.js, React, Redux, MongoDB, and SCSS with secure authentication (JWT, OAuth, bcrypt).
Implemented features like email verification (Nodemailer), file uploads (Multer), and real-time notifications (Toastify) with a scalable architecture.

TOOLS

Development & Deployment: VS Code, GitHub, Netlify, Postman, MongoDB Compass, RENDER
Frontend Frameworks & Libraries: Bootstrap, Material UI (MUI)
Productivity & Office Tools: Microsoft Excel, PowerPoint, Word

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, C, Python
- **Frontend:** React js, HTML, CSS
- **Backend:** Node js, Express js
- **Databases:** MongoDB, MySQL
